

STOPS SEVERE BLEEDING

CELOX™

Granular Haemostat

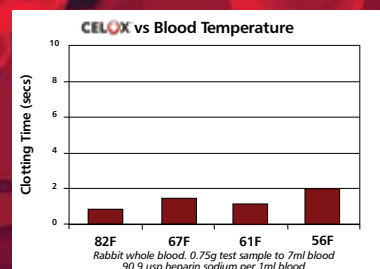

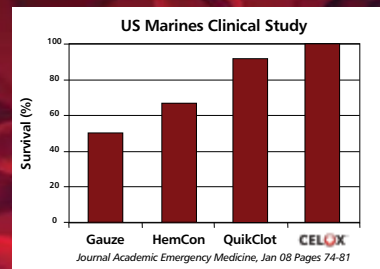

Celox™ can stop even potentially lethal bleeding fast. It is easy to use (just pour, pack and apply pressure), very safe (tested to class 3 CE Mark standards) and extremely effective. Celox™ saves lives.

When mixed with blood, Celox™ forms a robust gel like clot in 30 seconds. It works independently of the bodies normal clotting processes. Celox's™ clotting ability has been proven to work in the cold (hypothermia) or in the presence of common anti-coagulants such as warfarin. It generates no heat and will not burn the casualty or care giver. In clinical tests by the US mairnes, Celox™ was the only

product to give 100% survival. It gave a strong stable MAP (mean arterial blood pressure) and was also the only product to give robust clotting with no rebleeding**. Celox's™ safety has been tested to the intense class 3 CE mark standards. Celox™ is made with chitosan. Chitosan is broken down by lysozyme, a human enzyme, to leave glucosamine, a sugar which is normally found in the body***.

Are You Prepared...?

CELOX is suitable for...

- All moderate to severe bleeding wounds
- Arterial and venous bleeding
- Surface and deep wounds
- Head neck and face wounds

Easy, safe and very effective

CELOX has been shown to:

- Save lives
- Reliably stop arterial bleeding**
- Significantly reduce blood loss**
- Clot blood containing anticoagulants like Coumadin (warfarin)*
- Clot hypothermic (cold) blood*
- Generate no heat.

How does Celox work?

Pouring the CELOX into the wound prevents blood loss by forming a gel-like plug as the CELOX links to the surface of red blood cells.

Product ordering information

Order codes:

15g Box (200): FG08830181

Box Size: 180mm x 320mm x 380mm

35g Box (100): FG08830241

Box Size: 180mm x 320mm x 380mm
